1. Introduction

Demo4Green is a project cofinanced by EIT Manufacturing aiming at spreading the demonstration of technologies, that reduce the carbon footprint of industry, in existing high-technology infrastructures of RIS countries <https://eit.europa.eu/our-activities/eit-regional-innovation-scheme>. Following the concept of "test before invest", Demo4Green will first create a training module on how to implement a demonstrator in a Teaching and Learning Factory (TLF), aimed at industrial and technological companies as well as research teams. Then Demo4Green will select demonstrators to be implemented in the consortium Teaching and Learning Factories. Finally, Demo4Green will support technological companies (SMEs and Start-ups) and entrepreneurs with coaching to help RIS countries bring their green technologies to the market.

The following document contains information regarding the Frequently Asked Questions, about open call, application form and Demo4Green Project itself.

2. FAQ

1. In order to apply is it necessary to register to the F6S platform?

Answer: Yes, it is mandatory to register to the F6S platform before applying.

2. The platform F6S ask me to register a company before applying to the application form, it is necessary?

Answer: Yes, it is necessary, without a startup/company registered the application form is not accessible.

3. Once I try to register with my startup/company name the platform say to me that there exist a startup/company with that name yet, how I can proceed?

Answer: In this case someone in the past registered a start-up/company with the same name, to solve this problem the suggestion is to ask internally to your company if someone registered to the F6S platform before and who did it, then if you receive a positive answer ask anyone listed as a Co-Founder who is a Page Admin to add you as follows:

- a. The Co-Founder Admin should go to
<https://www.f6s.com/nameofthecompany>
- b. Click 'Edit' in the bar below the Page's logo
- c. Click 'People' on the left side
- d. Click the '+' in 'Add Co-Founder' section
- e. A box will appear where the Co-Founder Admin needs to type your name and choose your F6S profile from the dropdown menu

If instead there is no one internally who registered the startup/company profile you can create a new Company page via the 'Add your' menu on the top right side of the page and proceed with application.

4. Could a technology start-up created by a company and a Demo4Green partner be a beneficiary of the call?

Answer: No, the financial support is addressed to legal entity external and independent from consortium partners.
