# DEMO GREEN

**Green Manufacturing:  
Demonstrating  
technologies to fight  
Climate Change**

Co-funded by the  
European Union 

## About the project

**Demo4Green** aims at spreading the demonstration of technologies that reduce the carbon footprint of industry, in existing high technology infrastructures of RIS countries. The project contributes to the implementation of the Green Manufacturing concept - one of the policy areas of the European Green Deal.

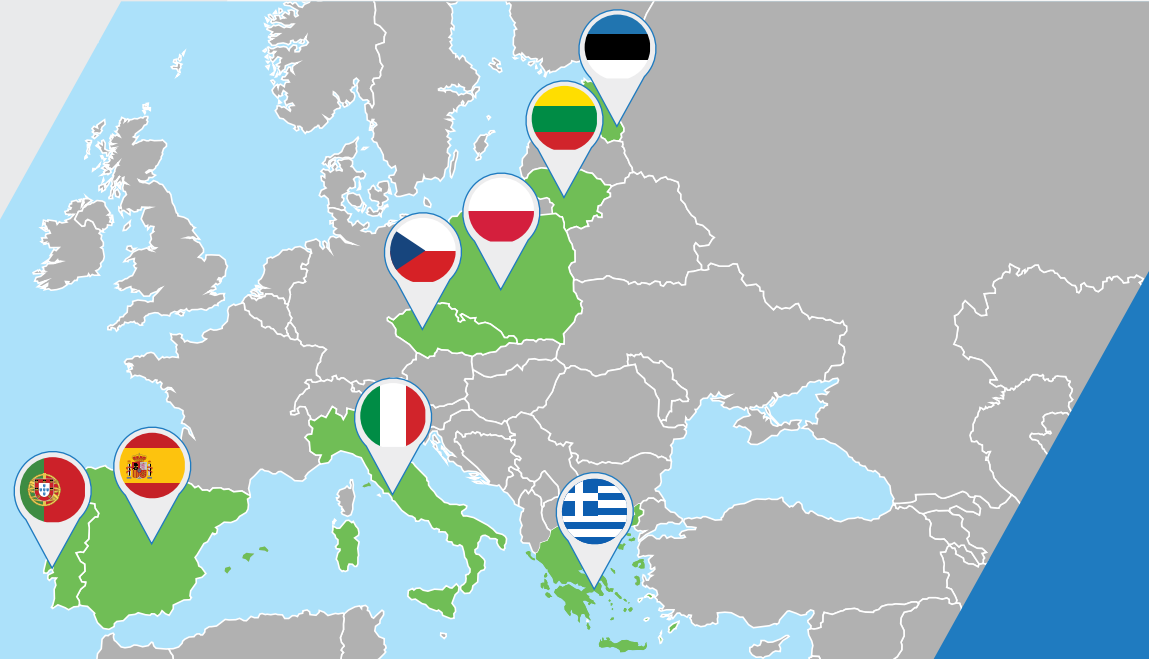

Following the concept 'test before invest' Demo4Green will allow SMEs, start-ups/ scale-ups, and research teams to test new technologies into industrial conditions, while supporting them into their Go To Market strategies.

Demo4Green project is an activity under the EIT Manufacturing RIS Programme.

The project duration is January 2022 – December 2022.

## Consortium

The project consortium consists of eight partners from RIS countries- all of them are research institutes or business organisations, having high technology infrastructures and being active players in R&D with technology and industrial companies.

### RIS countries

### EIT RIS countries

The EIT Regional Innovation Scheme (EIT RIS) was introduced to advance the innovation performance of more countries and their regions across Europe, especially countries with moderate or modest innovation scores as defined by the European Innovation Scoreboard.
